SHARP FOAM PAD

SFP

Dry or wet application

FREQUENTLY ASKED QUESTIONS

1 WHY USE SHARP FOAM PADS INSTEAD OF SCUFF ROLLS ?

Sharp foam pads will not leave finger marks and last much longer.

2 WHY DO SHARP FOAM PADS WORK FASTER?

Sharp foam pads eliminate the risk of sanding through and leaving finger marks.

3 HOW DO SHARP FOAM PADS ELIMINATE THE RISK OF SANDING THROUGH AND LEAVING FINGER MARKS?

Sharp Foam pads eliminate the risk of sanding through and leaving finger marks because the open-cell structure of the foam allows the contact pressure applied to be more evenly distributed.

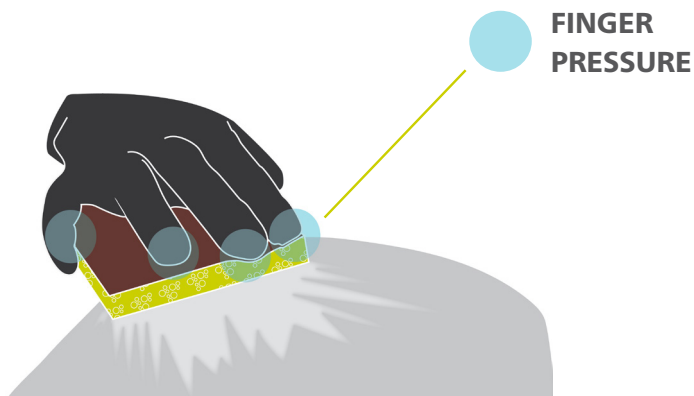

4 WHY DO SHARP FOAM PADS REMAIN SO FLEXIBLE WITHOUT LOSING THEIR GRIT ?

Sharp foam pads use foam as a carrier in conjunction with a flexible binder resin, this "direct coating" gives them an extreme flexibility and life span.

5 CAN I ONLY USE SHARP FOAM DRY ?

NO, sharp foam pads can be used both wet or dry. For plastic parts we recommend to use degreaser DGR, to create an antistatic effect and degrease at the same time.

NO FINGER MARKS DUE TO
PRESSURE DISTRIBUTING FOAM
