Article number:	LSP 20
Description:	**LSP 20 - Pressure sprayer premium 1l (FKM)**
EAN:	5491196003756

This Premium Pressure Sprayer 1L (FKM) is a professional-grade pressure sprayer designed for the efficient application of both water-based and solvent-based degreasers. Developed for automotive refinishing and industrial surface preparation, it helps users apply cleaning agents evenly while reducing product waste and improving workflow efficiency. The robust construction and chemical-resistant components make it suitable for demanding workshop environments.

Professional Pressure Sprayer for Surface Cleaning and Degreasing

The LSP 20 is equipped with FKM (Viton®-type) seals and components, providing excellent resistance to solvents and aggressive cleaning chemicals. Its 1-litre capacity and pressurized operation allow for continuous spraying, while the adjustable nozzle enables switching between fine atomization and a more concentrated jet pattern. The ergonomic design ensures comfortable handling during prolonged use.

Designed for professional paint preparation processes, the sprayer helps achieve clean, grease-free and dust-free surfaces before coating or refinishing operations. Proper surface preparation improves coating adhesion and contributes to higher-quality finishing results. Always consult our resistance list before use to optimize performance and longevity.

Key features

- Pressure sprayer for spraying different liquids
- Resistant to multiple mixtures due to FKM parts
- Ergonomic design with haptic grip for comfortable handling
- Adjustable spray pattern from atomization to jet
- Pressurized system for consistent product application
- Always consult resistance list before use

Packaging Information

- Per piece

Product details

- Brand: Finixa
- Number: LSP 20
- EAN: 5491196003756
- Material: high density polyethylene HDPE with FKM viton seal
- Content: 1000 ml
- Packaging: Per piece
- Units for outer box: 60
- Units for pallet: 360

Application

1. Unscrew the pump head and fill the reservoir to below the specified maximum level.
2. Tighten the head again. Pump 20 to 30 times to achieve the desired pressure. If the pressure decreases, you must pump again.
3. Push the spray knob and adjust the spray position by turning the spray head (atomization jet).
4. After use, clean the pump by spraying water or another suitable cleaning agent.

Maintenance

If the nozzle is blocked, clean with water or another cleaning agent. Always depressurize before storing.

Frequently Asked Questions

- **What products can be used in the LSP 20?**
  The sprayer is designed for both water-based and solvent-based degreasers. Compatibility should always be checked against the Finixa chemical resistance list.
- **Can the spray pattern be adjusted?**
  Yes. The nozzle can be adjusted from a fine atomized spray to a concentrated jet.
