

Cleaning clay lubricant

CCL 10

Specially designed to provide the vehicle with a lubricant during the claying process. This will allow you to remove adhered contaminants from the surface very easily and efficiently. With the help of this lubricant, the chance of scratches is significantly reduced and the surface feels smooth. After claying, the surface is ready to be polished or waxed.

- Lubricant for the clay process
- Clay block glides easily over the surface
- Does not cause scratches
- Removes tree resin
- Removes bird droppings
- Safe to use
- 1L
- Water-based product
