

## Sharp foam pad

### SFP 0080 - 1500

Finixa Sharp Foam Pads are produced in an environmentally friendly production line, using only solvent-free adhesives! We believe that it is in everyone's interest to continue developing ecological production methods.

We took our responsibility years ago by avoiding solvent-based adhesives as much as possible. Several sanding pads on the market today are still coated with a solvent-based adhesive. Not only are these of lower quality, but they also contribute enormously to air pollution and greenhouse gas emissions.

In addition, the solvent-free adhesive of Finixa Sharp Foam Pads is not only flexible, but more importantly, also much more elastic than solvent-containing adhesives. This is a great advantage for the life span, as the Finixa Sharp Foam Pads are less likely to tear. The solvent-free adhesive is also heat-resistant. No performance reduction only because of the sanding friction.

The Finixa Sharp Foam Pads are also coated with an extra ceramic-coated aluminum oxide grit, which makes them stronger and more durable. An additional advantage is that the ceramic coating also counteracts clogging, which also leads to a more uniform sanding result. The choice for the more expensive red ceramic AO grit makes the product unique and, in combination with the print on the side, clearly recognizable.

- 2-sided abrasive
- Super soft backing foam allowing the product to adapt perfectly to all profiled work pieces
- Extra flexible but resistant
- Pressure distributing foam reduces sanding through and guarantees an even and uniform sanding pattern
- Dry or wet application
- Ceramic coated aluminium oxide
- Grits: 80, 120, 220, 320, 500, 800, 1000
- Pad size: 120 x 98 x 13 mm
- Packed per 24 pcs
- Highly adaptable to contours, curves and profiles
- Can be crumpled up and stretched without creasing
- Low clogging, exceptionally long life expectancy
- Consistent performance throughout the life of the product
- Can be rinsed with water (saturated abrasive sponges)
- Ensures a high quality and even finish
- Faster sanding process = faster repair times
