

Sanding disc Ø 150mm without holes

SPDS

Paper disc without holes, available in different grids.

- For old & new paints
- High solid primers & clear coats & polyester putties
- Better performance when no dust extraction is available or necessary as the disc is completely covered with grits
- Double glued layer to avoid detachment of the grit
- Blue fired red aluminium oxide grit partly enriched with diamond based powder, to increase durability
- Uniformed orientation of the grit on the backing, insuring the sharpest point of the grit is making contact with the surface which increases the sharpness and speed during sanding
- Stearate hot melted coating avoids clogging of dust particles into the abrasive, giving it longevity
- Ø 150mm
